

INTESA SANPAOLO and Commercial Banks CO2 emissions spared through renewable energy (hydroelectric) use

■ Total monthly electricity consumption (millions of kWh)
 ■ Total monthly emissions spared (millions kg CO2) (1 kWh = 0,501 kg CO2)
— Lineare (Total monthly electricity consumption (millions of kWh))

Corresponding to **6.758.228** new trees

or compensated CO2 emissions generated by **122.877** (household electricity consumption - 3kW)

135.165 (medium-powered cars)

2008

2007
 Total electricity consumption (mil. kWh) : 452,634
 CO2 emissions avoided (tons) : 203.000
